

S- 5000 SEPARATOR

Drum drying machines are being used in many sectors. In order to benefit from the advantages of easy use and easy cleaning, we have used a drum sieve machine in the recycling of organic products. We introduce our drum separator machine that enables the processing of various fresh seeds such as grape seeds which was created by adding special additional designs our to standard machines. The quality of the materials and steel that we use for our products is the guarantee of the service time that our equipment will give you.

Drum Size:	Ø1900x5800 mm Stainless
Cleaning Component:	5 Mesh Stainless sieve wire
Main Engine:	11 kw
Drum Speed:	0-10 rpm
Body:	8 mm sheet and profile
Outside Dimensions :	2.3x7x2.9 m
Operating Field:	6x10=60m2
Weight:	1950 kg
Equipments:	Loading and unloading conveyors
Total Power:	20 kw 380 volt
Chassis Color:	RAL 5015
