

ONM 400 COLD PRESS OIL MACHINE

ONM 400 Cold press oil machine is an oil machine that designed for economic purpose oil production. It is suitable for long-term working conditions. Stainless steel parts are replaced by tool steel parts that are resistant to corrosion in our ONM-400 cold press oil machine, which we manufacture economically in series. Depending on the structure of all oil seeds, it extracts its oil at the lowest temperatures. With its easy-to-carry design, you can produce your own oil either in the kitchen of your home or in your garden. Onmak family will be always with you and our machine during the creating of the recipe for each seed that you will just start producing.

Working Principle:	Screw Press (Cold press)
External Dimensions:	355*1040*600 mm
Main Engine:	0,75 kw
Power Production:	Helical geared 3 Stage reducer
Heating Power:	80 W
Weight:	40 KG
Capacity:	1-10 kg oil seeds per hour (varies depending on seed density and hardness)
Speed:	20 rpm
Total Power:	0,76 kw 220 W 50 hz
